

Getting Started with SAS Windows Environment

Install Citrix Receiver

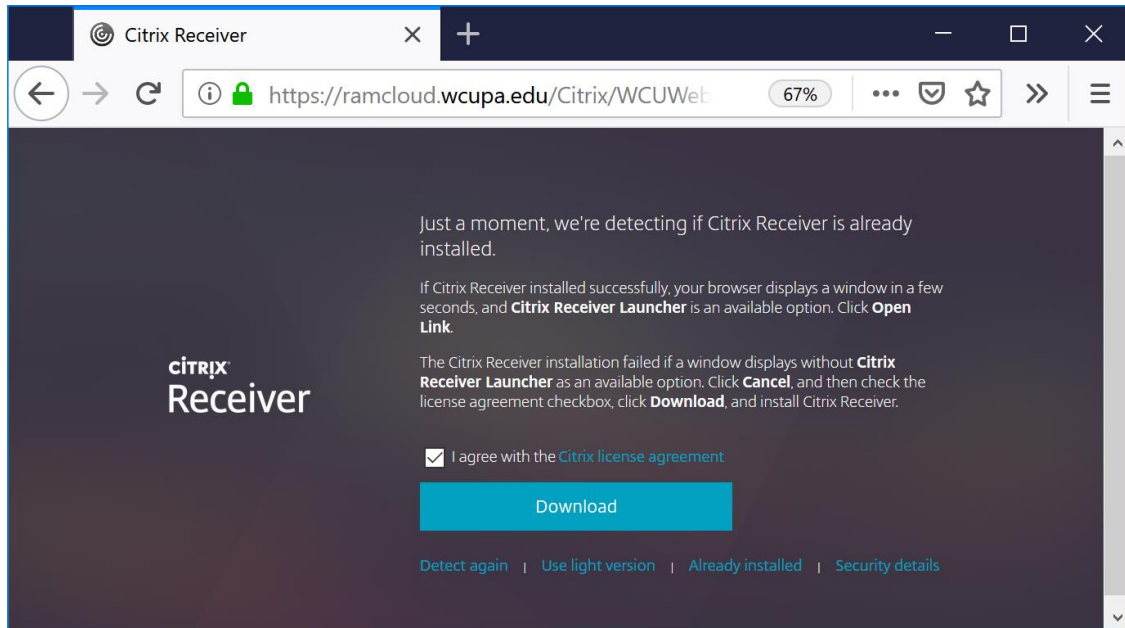

1. Open a web browser, preferably Firefox, and go to <https://ramcloud.wcupa.edu/vpn/index.html>. (Internet Explorer works well. Chrome does not work appropriately. I did not try browsers than these three)
2. Use your WCU email and password

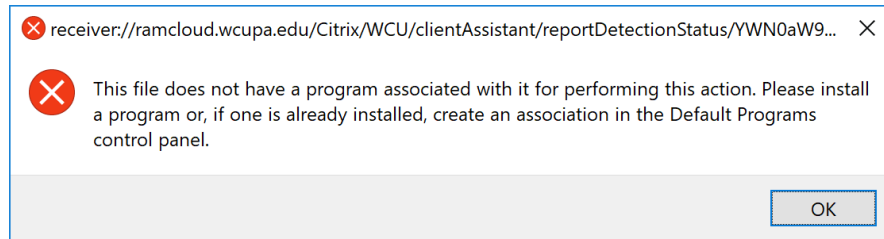

3. Click **Log On** to get the following

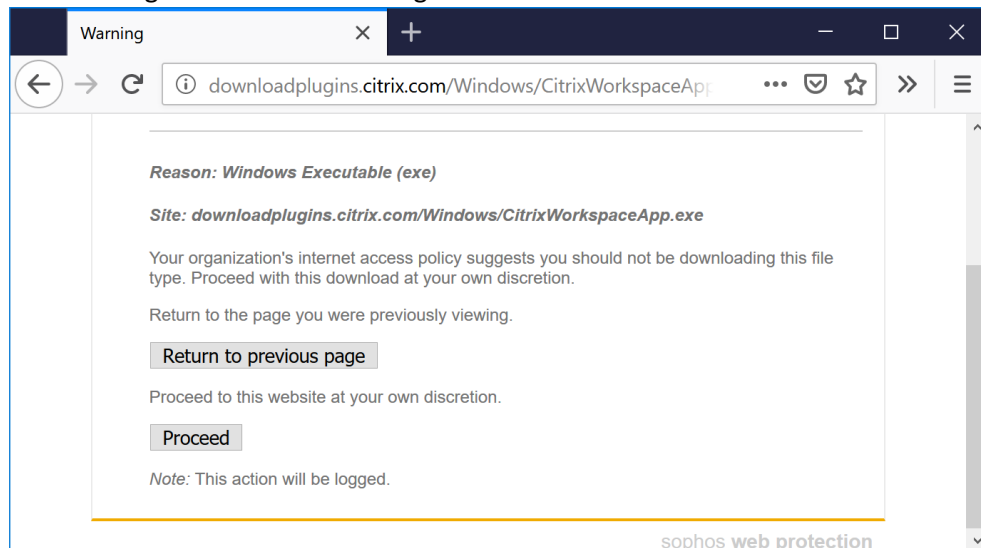

4. Click **Detect Receiver**,

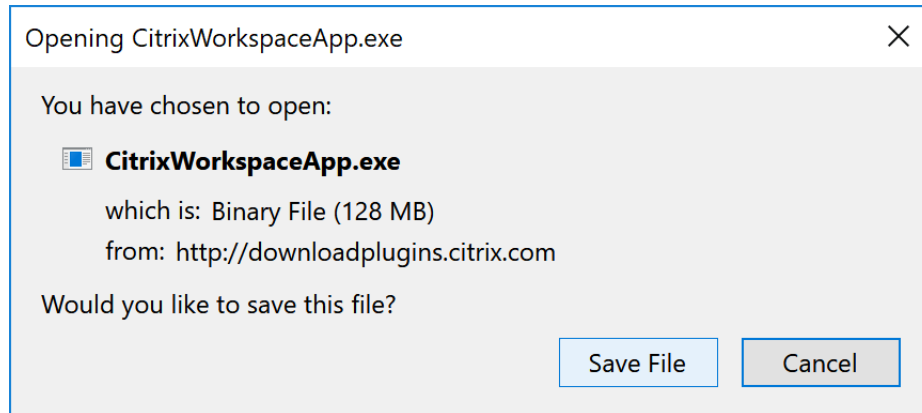

If you see following pop-up dialogue window, simply close it.

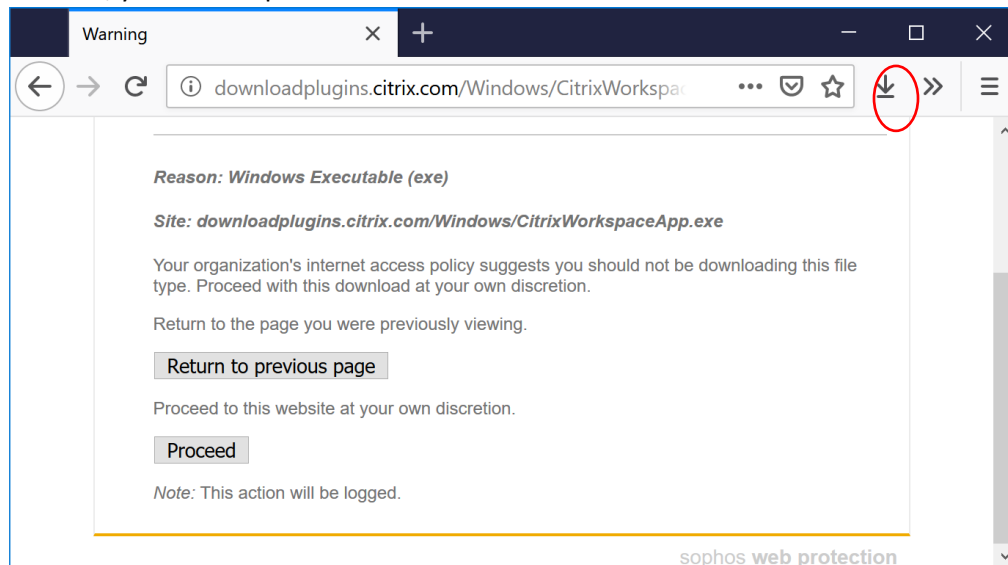

5. Check the box to agree with the license agreement and then click download.

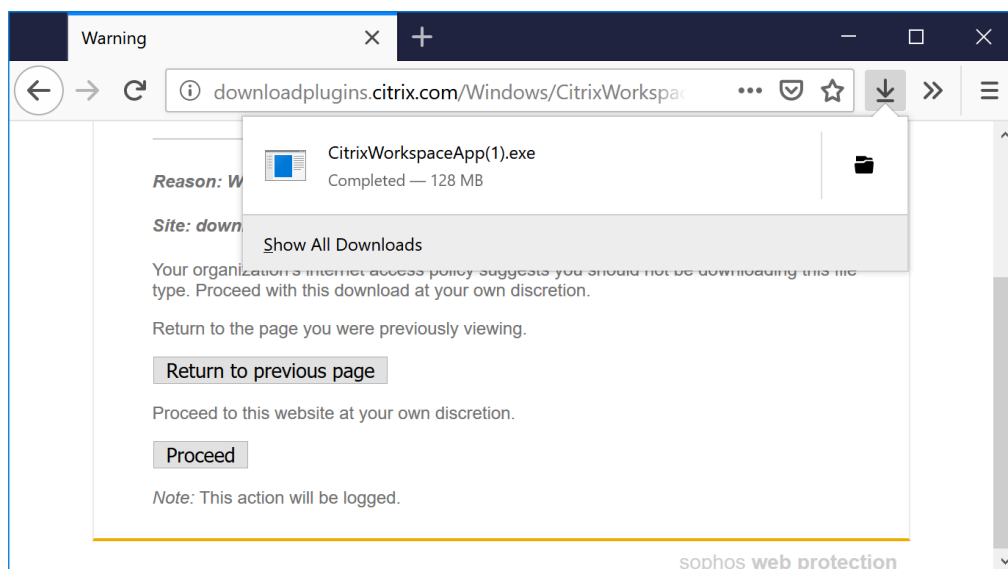

If you see the above warning information, click Proceed to get following window. Otherwise, the download process will start.

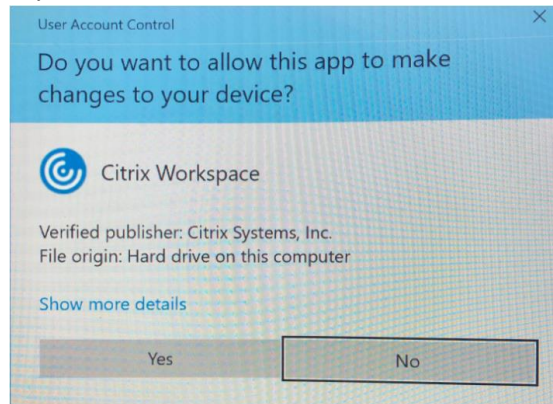

6. Click **Save File**, you will the previous window with an extra downward arrow

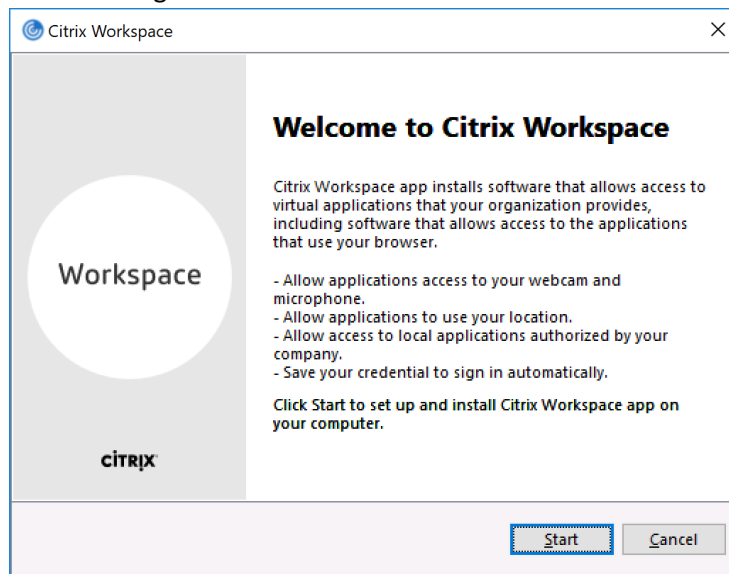

7. Once the download finished, left click the downward arrow, you will see **CitrixWorkSpace.exe**

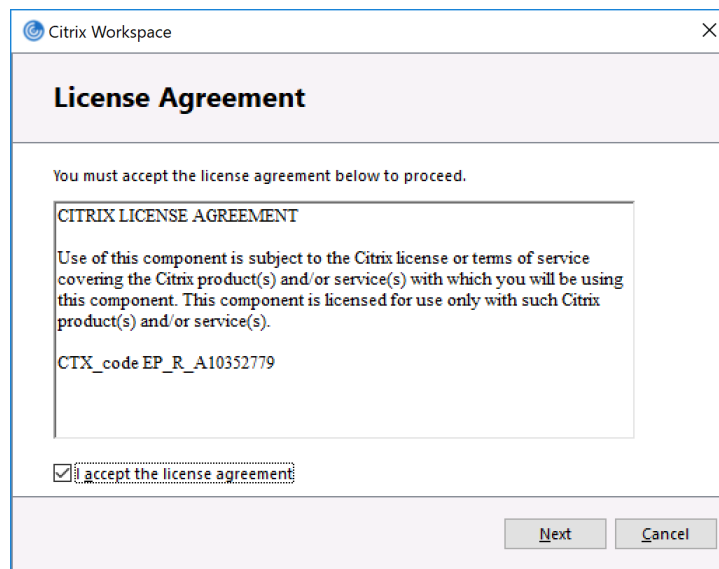

8. Click CitrixWorkspace.exe, you will see

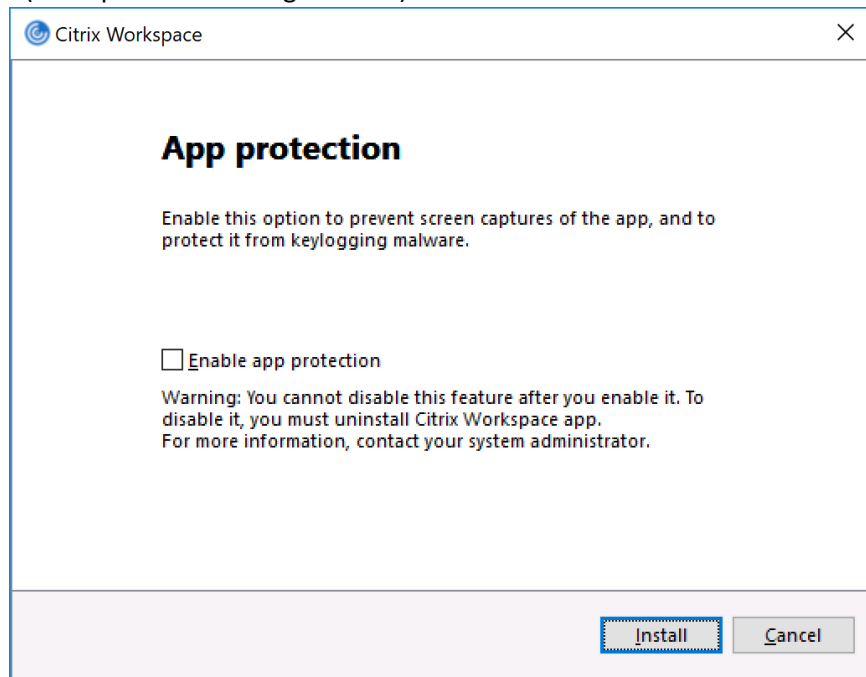

9. Click **Yes** to get the following

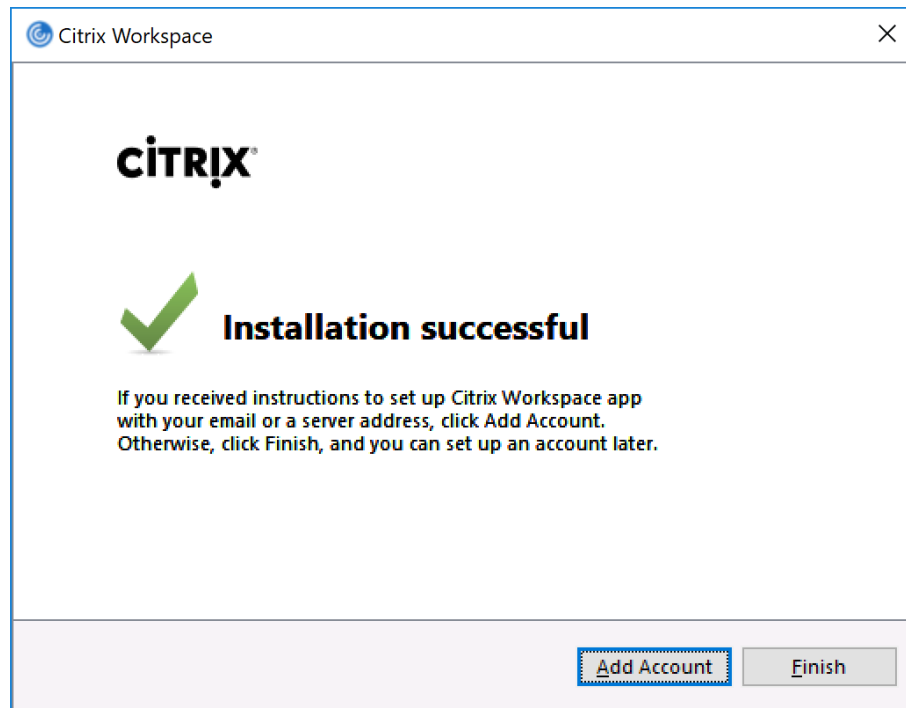

10. Click **Start** to get next window

11. Click the box (I accept the licence agreement) and click **Next**

12. Click **Install**

13. Click **Finish**. You are all set with Citrix Receiver installation!
