1. Introduction – Access SAS via Citrix

1

Introduction

2

- Course Objectives
- Course Delivery Method
- Software - SAS
- Access SAS through Citrix Receiver
- Install Citrix Receiver – Detailed Steps
- Launch SAS Application
- A Glance of SAS Windows
- First SAS Program: “Hello World”

1. Introduction – Access SAS via Citrix

2

3

Course Objectives

To familiarize you with programming in the SAS language. After completing this course, you should be able to:

1. Create SAS data sets from multiple sources, including direct input, external text files, and dataset generated from other applications.
2. Write SAS data sets out in appropriate format and stored it in certain directory.
3. Use appropriate techniques to combine data sets, subset data sets, extract certain observations from datasets
4. Create basic SAS graphs and generate basic reports using appropriate procedures.
5. Perform basic statistical analyses of data.
6. Prepare for the Base SAS Programming Certification Exam

1. Introduction – Access SAS via Citrix

3

4

Course Delivery Method

This course will be delivered asynchronously

My Responsibilities

1. Provide learning materials (notes and videos) every week;
2. Assign weekly HW/Quiz to test your understanding;
3. Hold Zoom office hours to help you with the course materials.

Your Responsibilities and Expectations

1. Study the weekly materials as early as possible;
2. Code as much as possible - Learning by coding!
3. Complete the weekly quiz after finish weekly materials before you do the assignments and meet the deadlines;
4. Ask questions!

1. Introduction – Access SAS via Citrix

4

Software

5

SAS - Statistical Analysis System

SAS is a software suite developed by SAS Institute that offers advanced analytics, multivariate analyses, business intelligence, data management and numerous other tasks.

1. Introduction – Access SAS via Citrix

5

SAS License & Access at WCU

6

SAS was installed on a remote server that resides in the RamCloud at WCU

<https://recap.wcupa.edu/infoServices/ramCloud/default.aspx>

You
can access SAS via a client software called
Citrix Receiver
to transfer data between SAS and your local computer.

1. Introduction – Access SAS via Citrix

6

What is Citrix Receiver

7

What Citrix Receiver is used for

Citrix Receiver is used primarily for connecting users to XenDesktops and XenApp desktops and applications.

Using Citrix StoreFront in conjunction with Receiver allows organizations to provide users with self-service access to their applications and services -- all with a common user interface, regardless of the endpoint device hardware, OS or form factor.

Xen Project (pronounced /'zen/) is a type-1 hypervisor, providing services that allow multiple computer operating systems to execute on the same computer hardware concurrently.

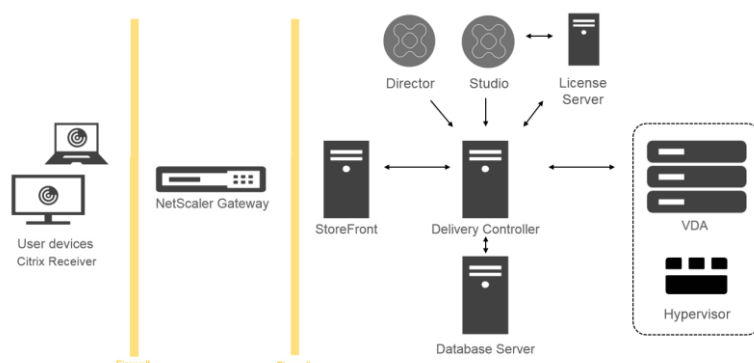

1. Introduction – Access SAS via Citrix

7

How Citrix Receiver Works

8

```

8

Install Citrix Receiver on A Local Machine

9

Go to ramcloud.wcupa.edu with Internet Explorer or Firefox

1. Introduction – Access SAS via Citrix

9

Install Citrix Receiver on A Local Machine

10

Download and Install Citrix Server

1. Introduction – Access SAS via Citrix

10

Install Citrix Receiver on A Local Machine

11

Click Start

The image shows a Windows window titled "Citrix Receiver". On the left is a dark sidebar with the "Citrix Receiver" logo. The main area has the heading "Welcome to Citrix Receiver" and a paragraph: "Citrix Receiver installs software that allows access to virtual applications that your organization provides, including software that allows access to the applications that use your browser." Below this is a list of permissions: "- Allow applications access to your webcam and microphone.", "- Allow applications to use your location.", "- Allow access to local applications authorized by your company.", and "- Save your credential to log on automatically." At the bottom right are "Start" and "Cancel" buttons.

1. Introduction – Access SAS via Citrix

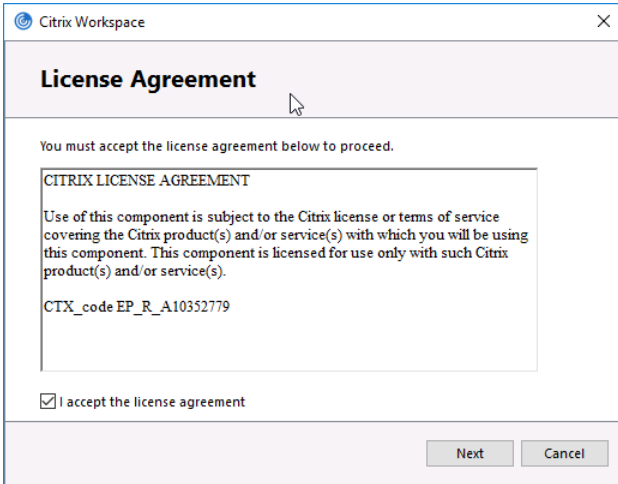

11

Install Citrix Receiver on A Local Machine

12

Check "I accept the license agreement" and then Click Start

The image shows a Windows window titled "Citrix Workspace". The main heading is "License Agreement". Below it is the text: "You must accept the license agreement below to proceed." A text box contains the "CITRIX LICENSE AGREEMENT" details, including a paragraph about terms of service and a code "CTX_code EP_R_A10352779". At the bottom left is a checked checkbox labeled "I accept the license agreement". At the bottom right are "Next" and "Cancel" buttons.

12

13

Install Citrix Receiver on A Local Machine

Do not Enable Single Sign-on. Just click Next

Citrix Receiver

Enable Single Sign-on

When enabled, single sign-on remembers your credentials for this device, so that you can connect to other Citrix applications without having to log on each time. You should do this only if your IT administrator has instructed you to. This will take effect the next time you log on to this device.

☐ Enable single sign-on

For more information on configuring single sign-on, please see article CTX133982 at citrix.com/support.

14

Install Citrix Receiver on A Local Machine

Click Install

Citrix Workspace

App protection

Enable this option to prevent screen captures of the app, and to protect it from keylogging malware.

☐ Enable app protection

Warning: You cannot disable this feature after you enable it. To disable it, you must uninstall Citrix Workspace app. For more information, contact your system administrator.

Install Citrix Receiver on A Local Machine

15

It takes a few seconds to install Citrix Receiver.

The image shows a window titled 'Citrix Receiver' with a subtitle 'Installing Receiver...'. It features a progress bar that is approximately one-third full, indicating the installation is in progress.

1. Introduction – Access SAS via Citrix

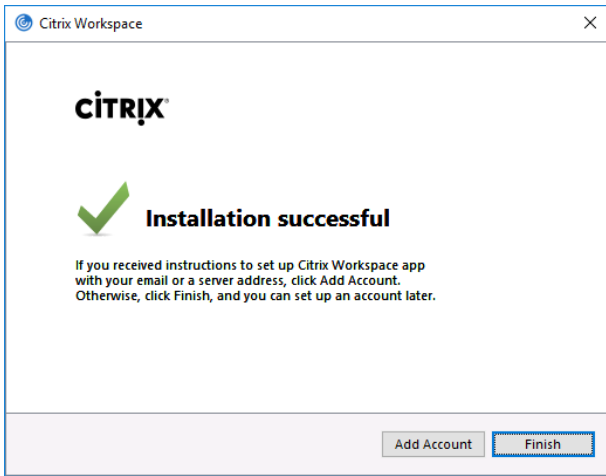

15

Install Citrix Receiver on A Local Machine

16

Click: Finish

The image shows a window titled 'Citrix Workspace' with a large green checkmark and the text 'Installation successful'. Below this, it says: 'If you received instructions to set up Citrix Workspace app with your email or a server address, click Add Account. Otherwise, click Finish, and you can set up an account later.' At the bottom, there are two buttons: 'Add Account' and 'Finish'.

1. Introduction – Access SAS via Citrix

16

17

Install Citrix Receiver on A Local Machine

Once the Citrix Receiver is installed on your machine, you will not need to do this step again.

How to access SAS and other Software?

Citrix on Mac21

On a Mac, you can use Safari to download the Citrix Receiver dmg. Run it and complete the installation. When the install is complete, go back to Ramcloud in Safari and launch your applications

1. Introduction – Access SAS via Citrix

21

Downloading and Uploading File via Citrix22

To save files,

select File > Save As from within the application. Browse to “Computer” and select your local drive.

To open files saved locally,

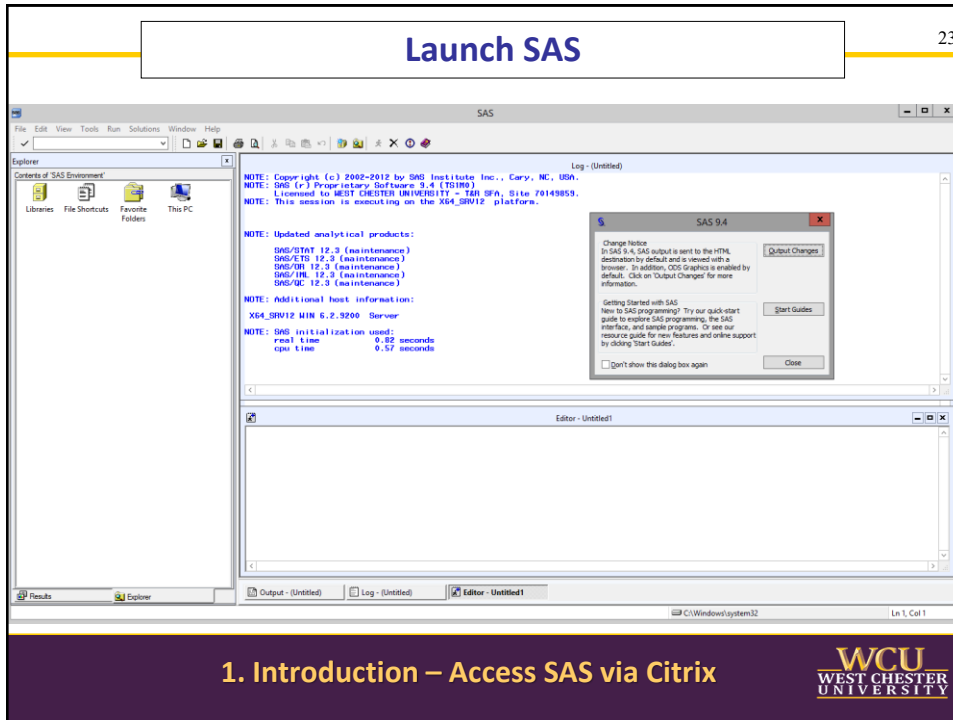

select File > Open from within the application and then browse to your local drives.

SAS Windows

- **Log Window:** It is an execution window. Here, you can check the execution of your program. It also displays errors, warnings and notes.
- **Code Window:** This window is also known as editor window. Consider it as a blank paper or a notepad, where you can write your SAS code.
- **Output Window:** As the name suggests, this window displays the output of the program/ code which you write in the editor.
- **Result Window:** It is an index that list all the outputs of programs that are run in one session. Since it holds the results of a particular session, if you close the software and restart it, the result window will be empty.
- **Explore Window:** It holds the list of all the libraries in the system. You can also browse the system supported files here.

1. Introduction – Access SAS via Citrix

25

26

SAS Datasets and Variables

SAS Data Sets

SAS data sets are called as data files. Data files constitute of rows and columns. Rows hold observations and columns hold Variable names.

SAS Variables

SAS has two types of variables:

- **Numeric variables:** This is the default variable type. These variables are used in mathematical expressions.
- **Character variables:** Character variables are used for values that are not used in mathematical expressions.

They are treated as text or strings. A variable becomes a character variable by adding a '\$' sign at the end of the variable name.

1. Introduction – Access SAS via Citrix

26

27

SAS Code Structure

SAS programming is based on two building blocks

- **DATA Step:** The DATA step creates a SAS data set and then passes the data onto a PROC step
- **PROC Step:** The PROC step processes the data

A SAS program should follow below mentioned rules

- Almost every code will begin with either DATA or a PROC Step
- Every SAS statement ends with a semi colon
- A SAS step ends with either RUN or QUIT
- SAS codes are not case sensitive
- You can write a SAS statement across different lines or you can write multiple statements in one line

1. Introduction – Access SAS via Citrix

27

28

SAS Datasets and Variables

SAS Libraries

SAS library is a collection of SAS data files that are stored in the same folder or directory on your computer or other storage such as USB drive or a space in the cloud.

- **Temporary Library:** In this library, the data set gets deleted when the SAS session ends.
- **Permanent Library:** Data sets are saved permanently. Hence, they can be accessed in the future SAS sessions.

Users can also create or define a new library known as user defined libraries by using the keyword **LIBNAME**. These are also permanent libraries.
